Organization: minainformatica.com

Location: Buenos Aires-Argentina / Asunción-Paraguay Remote

English: Advanced (B2/C1)

PROFESSIONAL SUMMARY

IT Infrastructure Specialist and Advanced L2/L3 Technical Support Lead with over 8 years of hands-on experience managing enterprise networks, server environments, and critical incident resolutions. Proven track record in network architecture (VLANs, Firewalls, QoS), Windows/Linux server administration, Active Directory, virtualization (VMware, Hyper-V), and cloud integration (AWS, GCP, Cloudflare). Equipped with a unique dual capability as a Full Stack Developer, allowing seamless root-cause diagnosis from the application/API layer down to the physical/logical network stack. Experienced in VIP Executive Support, ITIL methodologies, ticketing systems (InvGate), and Knowledge Base creation. Bilingual professional adept at collaborating with global cross-functional teams.

TECHNOLOGY STACK AND TOOLS

OS & Directory Services: Windows Server, Linux (Debian/Ubuntu), Active Directory, GPO, M365 Admin Center, MS Intune.

Networking & Security: Logical/Physical Administration, Firewalls, VLAN Segmentation, VPNs, QoS, AV/VoIP (Polycom).

Virtualization & Cloud: VMware vSphere, Hyper-V, Google Cloud Platform (VMs, IAM), AWS, Cloudflare.

DevOps & Development: JavaScript (ES6+), React 19, Astro v5, Node.js, REST APIs, Git, Docker, CI/CD, GitHub Projects.

Databases & Storage: Firestore (NoSQL), PostgreSQL, Backup & Disaster Recovery (DR) Strategies.

IT Service Management: ITIL Framework, InvGate, Knowledge Base Management, VIP Support.

PROFESSIONAL EXPERIENCE

IT Solutions & Integration Analyst (NEXA Project) | InnovaLab
(Jan 2026 – Present)

- **EdTech & AI Integration:** Co-designed and integrated AI-driven accessibility tools within LMS virtual classrooms, streamlining secure data exchange between platform APIs and institutional IT infrastructures.
- **Critical Path Analysis & Quality:** Evaluated user flows and diagnosed operational bottlenecks, reducing platform error rates and boosting final product reliability.
- **Cross-Functional Leadership:** Spearheaded strategic alignment meetings with project leads to resolve operational frictions, unblock technical dependencies, and ensure on-time delivery.

IT Consulting & Infrastructure Lead | MINA INFORMÁTIC (2019 – Present)

- **SME Infrastructure Architecture:** Designed, deployed, and maintained end-to-end IT infrastructure (Backups, Firewalls, Virtual Machines, and Security) tailored to SME budgets and technical requirements.
- **Multi-Cloud System Management:** Built and managed high-availability digital platforms utilizing Cloudflare, Firebase, and Google Cloud Engine, ensuring 99.9% uptime and data integrity.
- **Strategic IT Advisory:** Delivered cost-optimized technology roadmaps for business clients, acting as a trusted fractional CTO/IT Partner.

(More at: <https://minainformatica.com/>)

Software Architecture and Refactoring | Calviño Law Firm (2019 - Present)

- **Architectural Refactoring:** Led technical refactoring of legacy property management software, replacing obsolete modules with a modern React/Node architecture and preparing the codebase for cloud scalability.
- **Business Logic Integration:** Engineered complex financial algorithms (CPI/ICL inflation index adjustments and delinquency calculators), ensuring 100% precision with client legal/economic workflows.
- **Documentation & Maintenance:** Authored comprehensive software documentation (50+ pages) and technical manuals to streamline knowledge transfer and ongoing application support.
- **Strategic IT Advisory:** Delivered cost-optimized technology roadmaps for business clients, acting as a trusted fractional CTO/IT Partner.

IT Infrastructure & On-Demand Project Lead | AZ Brokers (2019 - Present)

- **Incident & Network Management:** Spearheaded the resolution of critical network failures by coordinating external specialist teams, restoring high-level service availability under tight SLAs.
- **Security & Compliance:** Deployed corporate-grade endpoint security, Antivirus, and Firewall configurations to protect confidential insurance data.
- **Knowledge Base Architecture:** Documented full IT network topologies and hardware assets, building a centralized KB for future scalability.

Project Leader & Infrastructure Manager | Moebius Therapeutic Center (2019 - 2020)

- **End-to-End Project Leadership:** I led and managed the comprehensive infrastructure upgrade project, from the **definition of architecture** and the **development of road map** until its execution.
- **Architectural Definition and Cloud Migration:** I led the selection of resources (hardware and cloud) and **I performed the complete migration** from emails to **Google Workspace**, and the instantiation of new resources in the cloud.
- **Team Management:** I provided technical leadership to the networking team, acting as the point of contact. **decisive** for the implementation of the new infrastructure.

Comprehensive Management: I ensured the operability and security of the system through proactive management of the IT infrastructure.

Infrastructure Manager & Project Leader | Espejo SA (2018 – 2022)

- **Data Center Migration:** Successfully planned and executed the full physical and logical IT migration to a new corporate building during company expansion, resulting in zero data loss.
- **Disaster Recovery (DR):** Designed high-availability Database Backup & Recovery strategies for mission-critical billing and management systems.
- **Server & Network Administration:** Maintained Active Directory, Firewalls, Load Balancers, and core domain infrastructure.

VIP Technical Support & Critical Incident Lead | Pampa Energía (2017 - 2020)

- **VIP & Executive Support:** Provided top-tier, priority technical support to C-level executives in a high-stakes corporate environment.
- **Critical Incident Resolution:** Resolved L2/L3 tickets via InvGate under strict SLA constraints, proactively analyzing root causes to prevent recurrence.
- **Network & QoS Management:** Administered corporate VLANs to segment critical traffic, optimizing Quality of Service (QoS) specifically for Polycom executive videoconferencing networks.

FEATURED PROJECTS

- **Real-Time Language Exchange Platform & Discord Community:**
Role: Lead Creator & Developer (Python, React)
Designed and built an interactive language practice application supporting multi-language pairing (English, Japanese, Portuguese).
Scaled and managed a global Discord community of 16,000+ active members, hosting bi-weekly live interactive sessions and managing community infrastructure.

ADDITIONAL TRAINING AND CERTIFICATES

Google Cloud Engineer Training | Ministry of Education, Buenos Aires (In Progress)

Certification in Innovation & Technology | InnovaLab / Future Skills Agency (2026)

Professional Certification: Full Stack Developer | Ministry of Education GCBA (2023 – 2025)

Fundamentos de Ingeniería de Software | Platzi Educación Digital (2024)

Internationalization of Digital Businesses | International Trade Center - SME Trade academy (2025)

IT Governance & Architecture | Carlos Slim Foundation (2024)

Docker Deployment (Node.js + NGINX) | Don Web Virtual Workshop

System Cybersecurity Certification | SNPP Paraguay (2023)

Diplomatura Técnica en Sistemas Informáticos | Carlos Slim Foundation (2023)

Curso de Excel Avanzado para Análisis de Datos | Platzi Educación Digital (2023)

Network & IT Security Administrator | Universidad Tecnológica Nacional (UTN FRBA) (2020)

Languages

English: Advanced / Professional Proficiency (B2/C1)

Spanish: Native

Guaraní: Native

SOFT SKILLS

- ★ **High-Agency & Self-Management:** Ability to prioritize critical infrastructure tasks independently and deliver roadmap commitments without supervision.
- ★ **Incident Management Under Pressure:** : Calm, structured approach during critical server outages or system failures, focusing on rapid restoration and root-cause analysis.
- ★ **Youth Mentorship:** Volunteer mentor guiding teenagers in technology learning paths and IT certifications through the Carlos Slim Foundation.

About My Mindset & Technical Drive

A proactive, self-taught engineer driven by continuous technical evolution and business-aligned problem solving. I actively expand my stack across cloud architecture, modern frameworks (React, Astro), and emerging paradigms (such as Smart Contracts & Web3). My relentless technical curiosity translates into scalable, high-availability solutions for growing organizations.
